# User Guide

## Product Overview

## Packing List

\*清单仅供参考，请以收到的实物为准

## Change Pen Nib

## Connection

### PC

Via USB Cable

Via USB Cable + OTG Adapter

Connect tablet to PC via USB cable (Use OTG Adapter if the PC only has USB-C port) ;

Indicator would flash if the tablet is successfully connected;

Please install the appropriate driver before use.

### Android Devices

Connect to your Android device via OTG Adapter + USB Cable;

Make sure **OTG Connection is supported and turned on in settings**;

**Disable Auto-Rotate and keep the device in Portrait Mode**;

Indicator would flash if the tablet is successfully connected;

Move the EMR Pen in active area to control the cursor.

## How To Use

Move the pen slightly above the active area (<10mm) without touching the surface, to control the position of the cursor.

Tap with pen tip = Mouse Left Click  
Tap with pen tip x2 = Double-Click

To use the pen buttons, hold the pen slightly above the active area within 10mm, then click the button.

Draw lines with changing thickness according to the force being applied to the pen (only available in softwares that support pressure sensitivity).
